Subject: 0000244266 - Interference

Good morning,

I began to evaluate 0000244266 (WKHD-LD) and found that it fails interference. Specifically, it causes 0.54% interference to WTIN. It looks like there might be a discrepancy in the height in the application form versus the height used in the TVStudy analysis you provided in your exhibit.

You have 30 days to amend the application and resolve the issue or it will be dismissed.
