

### **Extraordinary Circumstances**

which warrant temporary operations at variance from the Commission's Rules

KSNV (DT) 22 Las Vegas, NV had a failure of its transmission line that prevents use of the licensed antenna. This necessitates the use of the KVCW (DT) 29 Auxiliary Antenna (on the same tower) to allow KSNV (DT) to remain on the air. The STA requests operation at reduced power (52 kW ERP) using the KVCW (DT) 29 directional auxiliary antenna.

Replacement equipment has been ordered and repairs will be scheduled as soon as practical. This STA request is for 90 days to allow time for full repairs.

This is in the public interest as it will maintain service to the Las Vegas viewing population for KSNV (DT) 22.
