

Request for Silent STA  
for KVBA-LD  
May 24, 2024

On May 23<sup>rd</sup>, 2024, the local site manager for KVBA-LD and K14QG-D went up to the tower site to inspect the stations. He discovered that the transmission line for KVBA-LD was damaged. Therefore, we are working on a plan to get the station fully operational again and need to file for authority to take the station silent.
