

WYYZ- Extension of LMS#0000222079 Silent STA – Facility ID #46480

As previously advised in the original Silent STA request, WYYZ's licensed tower site was sold and the tower dismantled. After seeking alternate siting options, the new licensee of WYYZ (Gorilla Broadcasting ATL, LLC, acquired 2/8/2024) has secured an agreement with the new owner of the original licensed tower site to (a) permit installation of a long-wire antenna as a temporary solution and (b) permit the installation of a new self supporting tower at the licensed coordinates for a new permanent licensable transmitter site. New Licensee is currently working on an engineering STA to authorize resumption of operations using said long-wire system prior and intends to file same within the next 14 days in order to resume operations prior to 6/23/2024. Thereafter it will be filing an AM 301 modification of license application to specify a new transmitting tower design at the licensed facility coordinates.

As a result, WYYZ requests continued silent authority through 6/23/2024 to facilitate all of the above. WYYZ will notify staff when operations resume under the forthcoming engineering STA parameters using a longwire.
