

Justification for Reduced Power STA

On or about April 17, 2024, WLUV(AM) experienced an issue with its transmitter that resulted in the station being unable to operate at its authorized daytime power. Consequently, the station has been operating in night mode only. VCY America, Inc. ("VCY") is working to resolve the situation now, but requires additional time. Accordingly, VCY respectfully requests Special Temporary Authority to continue operating WLUV in night mode until transmitter repairs are complete.
