

## **ANGELS' HABITAT FOUNDATION PROGRAM MISSION**

Angels' Habitat Foundation, a non-profit corporation, will serve to educate, enlighten, and hearten individuals about:

- (a) the critical role of rescuing, rehabilitating, and protecting animals, wild or domestic, from barbarous and dreadful living conditions;
- (b) how the restoration and preservation of natural habitats to improve the lives of animals substantively impacts human lives;
- (c) how the reduction and recycling of pollution and waste protect animals, as well as human beings, fundamentally affect all lives, health, climate, and the economy long term; and
- (d) how the consequences of environmental devastation, food chains originating from polluted oceans and locations worldwide contaminated by human activity affect global survival.

KNIZ(FM)'s mission is to broadcast artistically uplifting and wide-ranging music genres to amplify how music and art empower and unite diverse human communities to bring forth respect and support of one another. Further, we aim to increase awareness and nurture solutions by inspiring hands-on engagement in biodiversity conservation and the protection of animals and wildlife, as well as the restoration of habitats. Within each program described in the KNIZ schedule, we will communicate past and current news, locally, nationwide, and internationally, of artists, people, events, sports, economy, culture, politics, whose beliefs and actions impact all life forms.
