

Amendment Statement:

The Greater Chattanooga Public Television Corporation (GCPTC) had submitted an application for a minor change in its licensed facility (WTCI) in September 2014 (BPEDT-20140925ACE). In that application GCPTC had used an incorrect power level of 200KW to replicate the current service area of WTCI (BLEDT-20060629ACO). In the amended application GCPTC is requesting a power level of 160KW which should duplicate the existing coverage area of WTCI and not cause increased overall interference to other stations.
