

licensee of WBXG-LP respectfully request the Commission's authority for the station to remain on the air as it prepares for its conversion to a fully digital operation. The licensee is currently negotiating for long term tower space and has identified and is preparing to purchase digital transmission equipment. Due to the time it will take to complete these tasks and in an effort to preserve the station's license, the licensee requests the Authority to suspend the station temporarily from operation. Once changes in the status of the station occur, the licensee will be notified immediately.
