KTAV-LD, Altadena, CA, 46D Minor Change

**LPTV DIGITAL – INTERFERENCE STUDIES**

1. Note that this proposal to replace the current directional antenna with a similar (but slightly different) antenna does not increase the ERP towards Mexico. (All pattern relative field increases are between 228 degrees True clockwise to 312 degrees True.) ***Therefore, coordination with Mexico is not required.***
2. Attached as Figure 1 are the OET-69 study results for the proposed facility (as the referenced station) as determined on a Sun Computer using a Solaris (Unix-based) operating system and using the same OET-69 software as developed for use by the FCC. (According to the software developer, the program used herein provides identical results as the FCC's OET-69 processing program.)
3. Due to an apparent anomaly in the Figure 1 results, interference above the de minimus levels is erroneously shown to occur to two adjacent channel 45D stations—KEDD-LD and KSKJ-CD. This is because the none of the “Before Analysis” results to these stations includes the licensed KTAV-LD facility. In other words, the existing level of predicted adjacent-channel interference from the licensed KTAV-LD facility to both KEDD-LD and KSKJ-CD is not being considered in the OET-69 program for the Figure 1 study. Without this proper baseline of predicted existing interference, the results are skewed and inaccurate.
4. *The antenna change being proposed by KTAV-LD is minimal with no antenna pattern change from 314 degrees clockwise to 226 degrees True—over three quarters of the licensed pattern is unchanged. And the pattern increase from 228 degrees True clockwise to 312 degrees true is minimal—less than 1.5 dB. The interference increase that results is below de minimus to both KEDD-LD and KSKJ-CD. In support of this fact, attached as Figures 2 and 3 are the predicted OET-69 interference results from the licensed KTAV-LD facility to KEDD-LD and KSKJ-CD, respectively. KEDD-LD is currently predicted to receive a level of interference from the licensed KTAV-LD facility of 18.3199%. KSKJ-CD is currently predicted to receive a level of interference from the licensed KTAV-LD facility of 1.1673%. The levels of interference to KEDD-LD and KSKJ-CD from the proposed facility (in Figure 1) are less than the allowed de minimus levels.*

KTAV-LD, Altadena, CA, 46D Minor Change

5. All studies are conducted in accordance with current FCC Rules and Regulations. As demonstrated by Figure 1, the proposed facility adequately protects all required US broadcast stations as required by the FCC Rules.

6. The applicant accepts any interference that is predicted to exist to the proposed facility by any licensed, authorized or previously proposed primary TV station. The applicant also accepts any interference that is predicted to exist to the proposed facility by any secondary TV facility that is given preferential status by the FCC over the Applicant's herein proposed facility.

##### Analysis of current record

Channel	Call	City/State	Application Ref. No.
45	KEDD-LD	LOS ANGELES CA	BDISDTL -20120618ABU

NOTE: WHILE THIS STUDY APPEARS TO SHOW INTERFERENCE, IT IS NOTED THAT THE "BEFORE ANALYSIS" SCENARIOS DO NOT PROPERLY INCLUDE THE EXISTING KTAV-LD LICENSED FACILITY IN ANY SCENARIO. WHEN THE EXISTING LEVEL OF INTERFERENCE FROM THE KTAV-LD LICENSED FACILITY IS CONSIDERED TO THIS LATER-FILED KEDD-LD ADJACENT-CHANNEL FACILITY (THE RESULTS ARE SHOWN IN FIGURE 2, ATTACHED, FROM THE LICENSED KTAV-LD FACILITY TO KEDD-LD), THIS AFFECTED STATION IS ADEQUATELY PROTECTED. THE INCREASED LEVEL OF INTERFERENCE IS BELOW 2 PERCENT.

NOTE: WHILE THIS STUDY APPEARS TO SHOW INTERFERENCE, IT IS NOTED THAT THE "BEFORE ANALYSIS" SCENARIOS DO NOT PROPERLY INCLUDE THE EXISTING KTAV-LD LICENSED FACILITY IN ANY SCENARIO. WHEN THE EXISTING LEVEL OF INTERFERENCE FROM THE KTAV-LD LICENSED FACILITY IS CONSIDERED TO THE KSKJ-CD ADJACENT-CHANNEL FACILITY (THE RESULTS ARE SHOWN IN FIGURE 3, ATTACHED, FROM THE LICENSED KTAV-LD FACILITY TO KSKJ-CD), THIS AFFECTED STATION IS ADEQUATELY PROTECTED. THE INCREASED LEVEL OF INTERFERENCE IS BELOW 0.5 PERCENT.
