

Extraordinary Circumstances

KEDD-LD, Facility ID 56793, was granted authority to operate pursuant to Engineering STA BSTA-20130930BFC on October 17, 2013. The latest extension of this existing Engineering STA BSTA-20130930BFC will expire on October 17, 2015. Because the Applicant was unable to file an extension of the existing Engineering STA in LMS, it was instructed by Hossein Hashemzadeh, Deputy Division Chief, FCC Video Division, to file this new Engineering STA instead.

The proposed Engineering STA is identical to the existing Engineering STA except for two typographic errors found in the Directional Antenna Relative Field Values. Corrections have been made to the values at 320 and 330 degrees.

The Licensee hereby respectfully requests that the Commission grants this Engineering STA to allow the station more time to construct its digital facility specified in the displacement construction permit BDISDTL-20120618ABU.
