

**TECHNICAL STATEMENT
RE: LICENSE CERTIFICATIONS
WREX CH. 13 ROCKFORD, ILLINOIS
WREX TELEVISION, LLC.**

LICENSE MODIFICATION

The applicant seeks to correct the geographic antenna location coordinates reflected on the current WREX station license. The new and old site coordinates are not different by more than 3 seconds in latitude or 3 seconds in longitude and, therefore, this corrective application is eligible for processing under 73.1690(c)(11). Accordingly, the aforementioned correction is not the result of a physical change in location and aside from an insignificant increase in ground elevation of 0.3 meters, WREX's other licensed parameters are unchanged.

SPECIAL OPERATING CONDITIONS

As indicated above, WREX has not made any physical changes to its previously constructed facility. Therefore, WREX remains in full compliance with all terms, conditions, and obligations set forth in the station's original construction permit as modified in BMPCDT-20080619ADW.
