

**TECHNICAL STATEMENT  
RE: LICENSE CERTIFICATIONS  
KDLH CH. 33 DULUTH, MINNESOTA  
SAGAMOREHILL OF DULUTH LICENSES, LLC**

**MODIFICATION OF LICENSE**

This technical statement was prepared on behalf of Sagamorehill of Duluth Licenses, LLC (the "Applicant"), licensee of digital television broadcast station KDLH Channel 33 Duluth, MN (Facility ID No. 4691), in support of an application to cover certain license modifications in accordance with 47 C.F.R. Section 73.1690(c).<sup>1</sup> The previous licensee filed a modification of license on May 28, 2015 to cover the replacement of KDLH's omnidirectional antenna, however, certain technical changes that resulted from the change in antenna were inadvertently omitted in that filing. Therefore, the Applicant is seeking to modify the station's technical facility data to reflect a decrease in the height of the antenna radiation center of less than 4 meters, a modest increase in the antenna power gain and a slight decrease in transmitter power output (TPO). The specified combination of antenna power gain and TPO does not change the station's authorized effective radiated power (ERP).

**SPECIAL OPERATING CONDITIONS**

As indicated above, The Applicant seeks to modify the station license in accordance with the provisions in Section 73.1690(c) for which prior FCC authority is not required. Therefore, KDLH will continue to operate in full compliance with all terms, conditions, and obligations set forth in the station's original construction permit as modified in BMPCDT-20060519AAE.
