**KXAS-TV, Fort Worth, Texas (FID No. 49330)**  
**Notice of Reduced Power Operations**

Stations KXAS-TV and KXTX-TV are currently operating at half power to facilitate installation of a new antenna, co-located on the same tower and authorized by LMS File #s 0000004418 and 0000007364, respectively.

Installation of the antenna and removal of the gin pole used to lift the antenna were expected to be completed in under ten days, but inclement weather conditions prevented the antenna lift and necessitated extended operation at reduced power. Full power operation will be restored as soon as weather conditions allow completion of the installation and removal of the gin pole.

Stations are working to complete the antenna installation as expeditiously as possible and will either notify the Commission when full power operations have been restored or file a request for Special Temporary Authority by June 5, 2016.
