

## WCFE-TV Reduced Power Notification

On Sunday, May 29, 2016, Mountain Lake PBS suffered a lightning strike to our main transmitter facility for WCFE-TV which damaged the power supplies and amplifiers. The Station returned transmission on Monday, May 30, 2016, operating at reduced power of approximately 50%. Further repairs and component replacement is underway, but reduced power operations are likely to extend more than 10 days. Should the reduction of power continue to beyond 30 days, the Station will request an STA.
