

### **Extraordinary Circumstances**

KUHD-LP, Camarillo, CA; Facility ID # 67963

Obidia Porras, licensee of KUHD-LP (the “Station”) respectfully requests an extension of special temporary authority (“STA”) to operate the Station on digital Channel 30 with transmitting facilities previously approved in STA File Nos. 000004668 (the “Original STA”). 0000010470 and 0000016557.

As was explained in the underlying request for the Original STA, shortly after the Station’s digital displacement facilities were constructed on Channel 44 pursuant to BDISDTL-20101018ACP, and a license application to cover that construction permit (File No. 0000004340) was filed, Porras received notice that the Station’s operations on Channel 44 caused interference to co-channel full-power commercial television station KILM, Barstow, CA. The Station was taken off the air in response to the KILM interference complaint. Porras then requested the Original STA so that the Station could continue to provide service, albeit with temporary facilities, at the same time that a solution to the Channel 44 interference issue was pursued.

A solution to the interference issue with KILM with respect to the Station’s operation Channel 44 has not yet been determined. However, since the Station has been able to temporarily operate on Channel 30 and provide video service without causing any interference, and, in the future, will have to relocate to a new channel in connection with the repacking of the television spectrum, the public interest would be served by permitting the Station to temporarily continue to operate on Channel 30 pursuant to STA.
