

W16DO-D ENGINEERING STATEMENT

(Page 1 of 87)

Media-Com Television, Inc.
Cleveland, OH

The attached application is prepared on behalf of Media-Com Television, Inc., licensee of Class A TV Station W16DO-D - Cleveland, Ohio. W16DO-D is presently licensed to operate on Channel 16 with a maximum effective radiated power of 10 kilowatts using a directional antenna. This application proposes operation on Channel 27 using a directional antenna with a maximum effective radiated power of 12.9 kilowatts and a directional pattern which is identical to W16DO-D's presently licensed directional pattern. This new antenna will be installed in place of the presently licensed antenna on the present tower to replicate the post-repack facilities authorized for W16DO-D. A separate exhibit provides details on the proposed new antenna, which was supplied by the antenna manufacturer. The installation of this replacement antenna won't result in any change in the overall height of this tower.

This exhibit includes the results of the FCC's TV Study program for the proposed facilities. As shown by this data, these proposed facilities won't result in a predicted 50.0 dBu noise limited contour which extends more than 1% further than that predicted for W16DO-D's authorized post-repack facilities in any direction. Furthermore, this data shows that these proposed facilities won't be predicted to cause any new or increased interference exceeding the permitted levels to any other authorized or proposed facilities requiring protection consideration. It also shows that these proposed facilities will be predicted to provide noise limited interference free service to 2,546,208 people, or 100.04% of the 2,545,221 people predicted to receive noise limited interference free service from W16DO-D's post-repack allotment facilities. The predicted 51 dBu protected contour for the proposed facilities will totally encompass Cleveland.

W16DO-D ENGINEERING STATEMENT
(Page 2 of 87)
Media-Com Television, Inc.
Cleveland, OH

A separate exhibit attached to this application documents that the proposed W16DO-D facilities will comply with the FCC's requirements regarding human exposure to nonionizing radiation.
