

TV Station WVER • as Channel 10 • Rutland, Vermont

Environmental Exhibit to FCC Form 2100, Schedule A

An environmental assessment is not required, as grant of this request would not be considered a major environmental action. WVER proposes to replace its old top-mounted analog Channel 28 antenna with a new top-mounted Channel 10 antenna. This will reduce the overall structure height from 94.5 meters above ground level to 86.6 meters. The maximum calculated power density at 2 meters above ground was found to be 0.56% of the applicable public exposure limit (0.20 mW/cm^2 at the Channel 10 center frequency of 195 MHz). The proposed operation is therefore categorically excluded under Section 1.1307(b)(3) of the FCC rules from having to consider the contributions of other stations at the site. None of the other factors specified in Section 1.1307 of the Rules are believed to apply.
