#### ENVIRONMENTAL STATEMENT

This proposal does not involve a site location specified under Section 1.1307 of the Rules.

The digital Class A TV station of the Applicant at this location produces an ERP of less than 14.3kW horizontal and 4.3kW vertical. With a maximum ERP of 18.6kW a relative field of 0.2 at critical angles and a distance of 91 meters to the lowest radiating element, the electromagnetic radiation will be well below the radiation standard.

The transmitter and antenna are enclosed with a security fence and the site is posted with RF hazard and high voltage warning signs. The applicant will cooperate with other operators in establishing a plan for work done on the structure or in close proximity to the antenna.
