Alien Ownership

Question	Response
1) Is the applicant a foreign government or the representative of any foreign government as specified in Section 310(a) of the Communications Act?	
2) Is the applicant subject to the provisions set forth under Section 310(b) of the Communications Act, for a broadcast, common carrier, aeronautical en route, or aeronautical fixed radio station Authorization?	
3) Is the applicant an alien or the representative of an alien? (Section 310(b)(1))	
4) Is the applicant a corporation, or non-corporate entity, that is organized under the laws of any foreign government? (Section 310(b)(2))	
5) Is the applicant an entity of which more than one-fifth of the capital stock, or other equity or voting interest, is owned of record or voted by aliens or their representatives or by a foreign government or representative thereof or by any entity organized under the laws of a foreign country? (Section 310(b)(3))	
6) Is the applicant directly or indirectly controlled by any other entity of which more than one-fourth of the capital stock, or other equity or voting interest, is owned of record or voted by aliens, their representatives, or by a foreign government or representative thereof, or by any entity organized under the laws of a foreign country? (Section 310(b)(4))	
7) Has the applicant received a ruling(s) under Section 310(b)(4) of the Communications Act with respect to the same radio service involved in this application?	
8) Has there been any change in the applicant's foreign ownership since issuance of the declaratory ruling(s) cited in response to Question 7?	
8a) Enter the File or Docket Number of the Petition for Declaratory Ruling that the applicant has filed for its foreign ownership in connection with this application pursuant to Section 310(b)(4) of the Communications Act. It is not necessary to file a request for a foreign ownership declaratory ruling if the applicant attaches a showing that the requested authorization(s) is exempt from the provisions of Section 310(b)(4).	
9) Does the applicant's foreign ownership comply with the declaratory ruling(s) cited in response to Question 7?

TRANSLATOR DISPLACEMENT FILING FREEZE WAIVER REQUEST

Oklahoma Educational Television Authority (OETA) hereby requests a waiver of the Displacement Filing Freeze (see Freeze on the Filing of Applications for Digital Replacement Translator Stations and Displacement Application, FCC Public Notice 29 FCC Rcd 6063 (MB 2014)).

This waiver is requested in order to file an application for a new channel for this translator due to the receipt of a 120-Day Commencement of Operations letter from a successful FCC Incentive Auction Winning Bidder. The winning bidder has notified the licensee that it intends to commence operations in the area and that the translator must cease operations on its existing channel. Consequently, the licensee has filed this application in accordance with the procedures set forth in the FCC Public Notice regarding TV Translator STA and Displacement Window Filing Procedures (DA 17-584, June 14, 2017).

The licensee is filing an application for a new channel that demonstrates compliance with the processing and interference standards as outlined in the Public Notice.

Furthermore, the licensee will be filing a companion Legal STA to enable operations on the proposed displacement channel in the interim until the Displacement Filing Window Applications have been processed.

Engineering Statement

Displacement of K38AK-D Proposed Channel 28 at Ponca City, Oklahoma August 20, 2017

This Engineering Statement has been prepared on behalf of the Oklahoma Educational Television Authority (OETA), licensee of Digital TV Translator Station K38AK-D at Ponca City, Oklahoma. The statement was prepared in support of a Displacement Channel Window Filing as well as a Legal STA seeking interim operations as herein proposed.

The translator currently operates on channel 38, which is outside of the new post-incentive auction core television spectrum. The licensee has received a 120-day Commencement of Operation letter from T-Mobile, a winning bidder in the FCC incentive auction. T-Mobile has advised the licensee that it must cease its operations on channel 38 in order to clear the spectrum in the area to enable the commencement of wireless operations in the band prior to the opening of the FCC TV Translator Displacement Channel Filing Window.

Following the FCC prescribed procedures, OETA respectfully requests a waiver of the Displacement Filing Freeze in accordance with the procedures released by the FCC in a Public Notice dated June 14, 2017 regarding filing procedures for such situations.

Granting the waiver and the STA would enable the station to continue its operations providing vital Public Television service as well as other information to the viewers in the area, while minimizing any disruption in service.

Therefore, OETA is filing both a displacement application and a request for Special Temporary Authority (STA) seeking authorization to move its operations to channel 28 from the existing tower site.

The parameters of the proposed facility are as follows:

Proposed Parameters:

Transmitter Location:	36-44-21.1 N 097-02-32.1 W (NAD 83)
Channel:	28
ERP:	13.0 KW
Emission Mask:	Stringent
Antenna Pattern:	Omnidirectional
Antenna Manufacturer:	Kathrein
Antenna Model:	UTV-11/P/W/L
Antenna RCAGL:	125.0 Meters
Overall Structure AGL:	128.0 Meters
RCAMSL	449.6 Meters

Interference Study:

An interference study was undertaken utilizing the FCC's TVStudy program to analyze the co-channel and adjacent channel interference scenarios for the new proposed channel of operation. A copy of the results from the TVStudy analysis is attached hereto.

The results of the study indicated that no impermissible interference would result from the proposed operations.

Based upon the forgoing interference study, it is believed that the proposed facility can operate without any impermissible interference to other stations.

RF Exposure Study:

Furthermore, a study was conducted to determine compliance with the RF Radiation Maximum Permissible Exposure (MPE) limits of the proposed operation. The study was conducted using the methodology outlined in the FCC's OET Bulletin 65 regarding RF Radiation Compliance.

The study utilized the proposed antenna height of 125.0 meters AGL and a reference height of 2 meters AGL for the reference location. This yields a distance from the antenna of 123.0 meters.

The proposed antenna elevation pattern indicates that the downward radiation from the antenna from 45° to 90° below horizontal has a maximum relative field value of 0.19 (at approximately 30° below horizontal). This value was used in conjunction with the

distance from the antenna and the prescribed formula from OET Bulletin 65 to determine a maximum predicted power density of $5.5\mu\text{W}/\text{cm}^2$ at 2 meters above ground level near the base of the tower. The Maximum Permissible Exposure Level (MPE) for the Uncontrolled/General Population environment for Channel 28 is approximately $371.3\mu\text{W}/\text{cm}^2$. Thus, the proposal is approximately 1.48% of the General Population MPE level and well within the allowable limit.

Based upon the forgoing it is believed that the proposed facility is in compliance with the required RF Exposure limits.

The licensee and all station personnel and contractors are required to follow appropriate safety procedures before the commencement of any work on the tower or in close proximity to the antenna. These procedures including reducing power or turning off the transmitter before any work is undertaken at the site. The licensee in coordination with any other users of the site must reduce power or cease operations as necessary to ensure workers having access to the site, tower, and antenna locations are not exposed to RF Radiation levels in excess of those prescribed by FCC Guidelines.

RE: Notification of Intent to Begin 600MHz Operations

Dear K38AK-D Licensee:

T-Mobile USA, Inc. ("T-Mobile") is notifying you that T-Mobile is preparing to commence operations on its 600MHz spectrum in the Partial Economic Area ("PEA") # 295 by 10/31/2017 and your station is likely to cause harmful interference to T-Mobile's operations.

To determine if your station(s) is likely to cause interference, an interference analysis has been performed, as specified by the Federal Communications Commissions' ("FCC") Inter-service Interference procedures²³⁷, using publicly available information in the FCC's Licensing and Management System ("LMS") for your facility. This analysis predicts field strength at T-Mobile's base station and user equipment locations in the PEA # 295 market from your facility. The FCC has set the thresholds at which the predicted field strength from low power TV and translator stations creates a sufficient interference risk to wireless facilities. T-Mobile has determined that your facility exceeds those thresholds and is an interference risk to its wireless operations.

T-Mobile will commence its operations in the PEA # 295 market on 10/31/2017. This letter provides the 120 days' advance notification required by FCC regulations, 47 CFR §73.3700(g)(4). The FCC regulations also require you to cease operations or eliminate the potential for harmful interference to T-Mobile's wireless facilities in the PEA # 295 market.

The FCC will work with you to attempt find a new television channel outside of the new 600 MHz mobile band that will not interfere with T-Mobile's network. You should review the FCC's Tools Available to LPTV/Translator Station Public Notice (enclosed) released on June 14, 2017 and contact Hossein Hashemzadeh, Melvin Collins, or Barbara Kreisman at the FCC for more information about the options available in your area.²³⁸

Please email 600MhzFC@T-Mobile.com once you have determined when you will eliminate the interference. If you would like additional information regarding our findings or if it might be
