

Allocations & Interference Analysis
KWEX License Partnership, L.P.
KWEX-DT San Antonio, TX
Channel 24 800 kW-DA 388 m

This proposal is one of four linked, concurrently filed applications that seek to change channel assignments of central Texas stations to move use of channel 14 from a full power to a class A station, lessening the likelihood of interference to land mobile services on adjacent lower frequencies and the cost of mitigating such interference. The applications involved are:

KNIC-DT	San Antonio	Channel 24 to channel 27
KWEX-DT	San Antonio	Channel 14 to channel 24
KXLK-CD	Austin	Channel 24 to channel 14
K27LF-D	San Antonio	Antenna & ERP changes on channel 25

The proposed operation of KWEX-DT was evaluated using the FCC's TVStudy software and found not to cause an impermissible increase of interference to any station other than those entering into the mutual interference agreements attached to this application. The TVStudy data output is attached hereto. Please note that this analysis used the 1 km cell size (due to the presence of several class A stations) and a more granular 0.2 km terrain interval, due to the hilly regions locate north of San Antonio. The following information should be considered when reviewing the TVStudy data output:

1. The scenarios involving KNIC-CD are irrelevant, as that station has specified channel 27 in a concurrent application. Accordingly, KNIC-CD was excluded from the "undesired" lists of all relevant "after" scenarios.
2. Likewise, the scenarios involving KXLK-CD are irrelevant, as that station has specified channel 14 in a concurrent application. Accordingly, KXLK-CD was excluded from the "undesired" lists of all relevant "after" scenarios.
3. The facilities requested by KWEX-DT in this application for channel 24 were used in the "after" scenarios.
4. The antenna and ERP modifications specified by K27LF-D in its concurrent modification application for channel 25 were used in the "after" scenarios.

5. The licensees of KNVA and KWEX-DT have entered into a mutual interference agreement regarding the interference predicted in the TVStudy analysis, as nearly all interference to each station falls outside its DMA.
6. The K27LF-D licensee has accepted the interference from the proposed facilities of KWEX-DT on channel 24, as the cumulative effect of both stations' changes causes a net increase of interference-free population of K27LF-D.
