

Explanation of Other Issues effecting Construction

KWEX License Partnership, L.P.

KWEX-DT San Antonio, TX

KWEX originally was assigned to channel 14 and subsequently granted an unable to construct waiver. With the guidance of FCC staff, KWEX has applied for a CP to operate on channel 24, which is contingent on a complex set of business transactions, including the acquisition of a Class A station in Austin in order to implement a change to that station's channel assignment. The Austin Class station application for channel 14, and additional applications to implement the contingent arrangements, remain pending before the Commission.
