

WCLF, Clearwater, Florida
Facility Id. 11125
Request for Special Temporary Authority

Explanation

A critical WCLF transmitter part has failed, limiting the ability of the station to achieve authorized power levels. The part has been sent for repair. In the interim, the station is only able to achieve approximately 30% of authorized power, or 300 kilowatts. WCLF is working diligently to repair the transmitter and restore normal operating power, and respectfully requests authority to operate at 30% of authorized power for a period of 180 days.
