

Antenna Structure Registration Substitution

Nexstar Broadcasting, Inc. ("Nexstar"), as the successor in interest to LIN of New Mexico, LLC¹, the current licensee of K38HR, Santa Rosa, NM, FAC ID 59098, submits the instant license to cover application in association with the underlying construction permit, FCC File No. BDFCDTT-20120604ADU (the "CP"), which was granted on June 6, 2012. The CP lists the associated antenna structure registration ("ASR") as 1201958, which was cancelled in July 2002. See FCC File No. A0272261. The correct ASR should reflect ASR 1231696, which is a duplicate of the cancelled structure except for the height. ASR 1231696, which is located at the same coordinates as ASR 1201958, is approximately 37 feet taller and as such does not materially change the CP. Accordingly, Nexstar respectfully requests that the Commission update the CP and subsequent license records to correctly reflect ASR 1231696.

¹ See FCC File No. BTCCDT-20160210ACJ.
