

**INTERFERENCE RESOLUTION COMMITMENT
GREATER WASHINGTON EDUCATIONAL TELECOMMUNICATIONS
ASSOCIATION, INC.
AMENDMENT TO CONSTRUCTION PERMIT APPLICATION FILE # 0000029879
WETA-TV, WASHINGTON, DC
PROPOSED: CH 31, 1000 KW, NON-DIRECTIONAL, 257 m HAAT**

This commitment is submitted by Greater Washington Educational Telecommunications Association, Inc., licensee of WETA-TV (“WETA”), to amend a construction permit application, file number 0000029879, to construct its post-auction television repack facility.

Applicant acknowledges that the application processing software, TVStudy, will return a notification showing adjacent channel interference into an application, file number 0000029340, filed with the Commission by WIAV-CD (WIAV), when using the parameters WETA requested in its Engineering Statement filed with its application. WIAV is proposing to operate on channel 30, the lower adjacent channel to WETA, at an Effective Radiated Power of 30 kW.

After discussions with the licensee of WIAV, WMTM, LLC, and the Commission staff, WETA herein commits to using an 8-Pole post-transmitter filter. The use of this filter will further reduce the out-of-band emissions over that defined by the “FCC Mask” for a full-power station and, therefore, mitigate the lower adjacent channel interference into channel 30, to be occupied by WIAV.
