

TV Station KLTS-TV • Channel 17 • Shreveport, Louisiana

Environmental Exhibit

The purpose of this application is to increase the effective radiated power of permitted Station KLTS-TV, post-auction Channel 17, Shreveport, Louisiana, from 297 kW to 550 kW. An environmental assessment is not required, as grant of this request would not be considered a major environmental action. The maximum calculated power density at 2 meters above ground was found to be less than 5% of the applicable public exposure limit (0.33 mW/cm^2 at the Channel 17 center frequency of 491 MHz). The proposed operation is therefore categorically excluded under Section 1.1307(b)(3) of the FCC rules from having to consider the contributions of other stations at the site. None of the other factors specified in Section 1.1307 of the Rules are believed to apply.
