#### JUSTIFICATION FOR SILENT STA

These stations operate on Channels 38-51, outside the post-incentive auction television broadcast band, and were notified by T-Mobile that it planned to commence operations on frequencies including the 614-698 MHz band during the 4<sup>th</sup> quarter of 2017.

The licensee would prefer to avoid changing channels twice and therefore wants to wait to apply for a displacement channel until after all applications for full power stations in the area requesting channel changes and coverage area increases have been filed, placed in the FCC's database, and hopefully processed.

Meanwhile, to avoid possible interference to T-Mobile's operations in the near term, the station has been taken dark. It will remain dark until a displacement proposal has been approved, although if the one-year deadline in Section 312(g) of the Communications Act to resume operation comes before a displacement application has been granted, special temporary authority may be requested to resume operation on a temporary channel.
