Subject: KPSP- Repack Project Budgetary Proposal Rev.2

Mr. Dechant,

Wireless Infrastructure Services is pleased to provide this proposal for your review.

Scope of work-

- Provide continuous project management and coordination throughout project
- Assist with the design, planning and engineering phases of the project
- Coordinate shipping, storage and delivery of all equipment
- Install new air cooled, 1 rack transmitter system including grounding, electrical and RF plumbing
- Assist with cutover
- Remove and properly dispose of old antenna, transmission line and transmitter located at lower site
- Provide true up for final costs

Budgetary total

\$53,700.00

Qualifications-

- This is a budgetary proposal; final costs will be calculated during the “true up” and final invoicing
- This proposal does not include out of scope work, additional work requested by the customer, additional work or changes required due to engineering/design changes, weather delays, equipment delays, cutover delays, other work not associated with or approved under the “Repack” agreement and any other unknowns
- This proposal does not include the final system proof, this should be contracted via the transmitter supplier. However, WIS did include the installation of the entire transmitter system.

Payment Terms-

50% deposit to engage (1/18)

30% due when new transmitter arrives

20% due after cutover (Note- this will be the final billing and will be based on actual costs as a true-up) NET 30

Wireless Infrastructure Services appreciates the opportunity to bid on this project and looks forward to working with you. Please contact me directly with any questions.

Best regards,

Travis Donahue
