

## **CIRCUMSTANCES REQUIRING SILENT AUTHORITY EXTENSION**

The station went off the air on September 1 because of Hurricane Harvey.

The hurricane flooded out the station's transmitter site, and the licensee was, at the time of the initial request for silent authority, unable to get in to see how bad the damage was. The station was required to be off the air until the licensee was able to get in and replace whatever was damaged.

The process of restoring the station's facilities has now begun. However, it does not appear that the station will be able to restore its facilities prior to the current expiration date of the initial silent authority. Accordingly, an extension of silent authority for an additional 6 months is respectfully requested.
