

**Notification of Temporary Reduced Power Operations**

It has become technically impossible to operate TV translator station W24DE-D, Miami, Florida (Fac. ID No. 168061) at full authorized power. The reduced power operation began on January 22, 2018, and the station is currently operating with a transmitter output power of approximately 25 percent of authorized levels.

The issue plaguing the facility's operation is a failed transmitter module, and the licensee has already returned the module to the vendor for repair. The licensee does not yet know when the repaired module will be returned to the station for installation.

The licensee will notify the Commission once full authorized operations have been restored and will seek STA if the reduced power situation will last for longer than 30 days.
