

## **DETERMINATION OF THE “LARGEST STATION IN THE MARKET”**

It appears from an analysis of the stations that are licensed to communities located in the Birmingham (Anniston & Tuscaloosa), Alabama Designated Market Area (DMA) that the largest station in geographic area is WVUA, channel 6, licensed to Tuscaloosa, Alabama with a predicted coverage area of 46,549 square kilometers. The pending application to increase WDBB’s ERP to 675 kW results in a predicted coverage area of 44,738 square kilometers. Clearly WDBB is entitled, according to Section 73.622(f)(5), to the proposed increase in its ERP to 675 kW.
