When an interference analysis was performed on K25LG's existing facility it was found that KCEB, Longview, TX's FCC assigned adjacent channel 26 Repack facility described in application BLANK0000001435 would receive 1.45% interference. After an investigation was made, it was determined that by changing K25LG's filter to Full Service Mask would mitigate the interference without losing a significant number of viewers.
