

Ramar Communications, Inc.  
Legal STA Extension Request  
April 10, 2018

By this application, Ramar Communications, Inc. (“Ramar”) hereby requests an extension of the authority granted Ramar in connection with STA File # 0000030468 (the “STA Request”) for digital Television Translator station K45IL-D, Channel 45, Hobbs, NM, Facility ID 55034 (the “Station”) to operate on Channel 19. The FCC previously granted the STA Request while Ramar’s Displacement Application, filed in conjunction with a request for waiver of the FCC’s Displacement Freeze (*see* Public Notice, DA 14-808, rel. June 11, 2014), was pending FCC processing (see LMS File No. 0000030467). The Displacement Application has not yet been granted and is still pending. Grant of this extension application is therefore respectfully requested. Such grant would allow the Station to continue to provide valuable service to the viewing public in its service area during the repacking process.

Copies of the narrative exhibit to the STA Request and the related T-Mobile Displacement Letter are attached hereto.
