

**TECHNICAL EXHIBIT**  
**2018 DISPLACEMENT/FILING WINDOW FOR LPTV**  
**AND TV TRANSLATOR STATIONS**

FACILITY: W43CB-D, FI 6044  
MIAMI, FL  
MINISTERIO OSCAR AGUERO, INC.  
Existing FCC file number BLDTL-20120831ABP

Pursuant to the LPTV/Translator displacement/filing window of 2018 arising from the incentive auction 600 MHz TV band repack, the within application is filed to change the facility as follows: output channel changed to VHF 08, FULL SERVICE mask employed. Antenna make and model is to be KAT K523 series Cpol array to be located on existing tower ASR 1032485 at 57m AGL, rotation 115°. To do so, the facility is moved less than 30 miles from its presently licensed site.

NIER is less than 5% of the limit for this service; no new tower construction is planned. Using the specified equipment, pattern and ERP, the application is in compliance with all pertinent portions of §74.793 with respect to all existing part 73 and part 74 licenses, permits and applications known as of the time of filing; however, as a station in the LPTV or TX service which is displaced or otherwise required to modify its facilities in accordance with the presence of an incoming repacked full service station assigned to its previous channel, the within applicant agrees, if necessary, to not operate on the channel or with the service proposed in the within application until any potentially mutually interfering repacked full service station or stations have left their channels pursuant to the relevant phase assignment(s).

It is noted that two directional AM stations, WRHC and WWFE, are located within 3.2 km of the tower. No tower modification is planned; the specified antenna will be merely mounted on the existing tower. However, prior to installation the applicant will contact and coordinate with engineering personnel associated with both stations.
