

STA Extension Request

The applicant respectfully requests STA to continue operating its displaced TV translator facility (K51LO-D, Facility ID No. 183687) on channel 15 (under call sign K15KK-D) pending the results of the upcoming Special Displacement Window. The applicant initially received STA for this operation in LMS File No. 0000030132.

Parameters for the continued temporary operation of the facility on channel 15 would be consistent with the parameters currently in operation and as specified in the pending displacement application in LMS File No. 0000030131.

Grant of this STA extension would be in the public interest because it would allow the applicant to continue to provide the programming of co-owned full power station KOAT-TV to viewers in the Mt. Powell area of New Mexico pending the results of the Special Displacement Window.
