

## Environmental Statement

Ukiah Channel 16

May 1, 2018

The applicant proposes to operate at a height of 22 meters at an ERP of 9,000 watts horizontally polarized on channel 16. This proposal is well within both the controlled and uncontrolled limits for radiation exposure. Towers warning of radiation hazard are posted in and around the site, and station staff are trained how to cease operation in the event that anyone climbs the tower.
