

K39AA-D Displacement Application to channel 35, Ninilchick, AK
Facility ID No. 62767

K39AA-D was on the air and licensed as of April 13, 2017 on a frequency repurposed for new, flexible use by a 600 MHz Band wireless licensee. It is therefore eligible to file this displacement application to an in core channel (35) with facilities that satisfy allocation constraints and FCC rules.

The applicant proposes to change K39AA to channel 35 with 15 kW ERP using a directional antenna pattern at the tower registered as ASR 1003111. This is the K39AA licensed site.

An Interference Check with TVStudy 2.2.5 with K39AA on channel 35 with 15 kW ERP using the proposed directional antenna is included. The study was run protecting pre-transition records not on their baseline channel and protecting baseline records from LPTV.
