

K34LP-D Ch 20
FI 167939

The channel assignments requested in this application are part of a coordinated statewide TV translator plan throughout the state of Utah. Working with all parties, the engineering community has created a comprehensive plan that will relocate both in and out of band channels to create a working translator network. While little or no interference issues are anticipated, all parties have agreed to settle any perceived interference issues among themselves.

Environmental Statement:

Antenna is installed on an existing tower and the equipment installed in an existing building. No construction is involved.

Non-ionizing radiation at ground level head height is less than the allowable public exposure limit. No special precautions required.

Millard County is having to adjust a number of in core channels to accommodate out of core channel displacements in order to make the translator input/output system work.

K34LP is seeking Ch 20 in order to not cause interference to Millard County application K38JT, Ch 34.

Respectfully submitted,

B. W. St. Clair
