

W45DF-D, Knoxville, TN

Facility ID# 167727

24 May, 2018

Technical Exhibit

W45DF-D on channel 45 will be displaced no later than 07/3/2020 due to it being on one of the “guardband” channels for the incoming wireless services in the 600 MHz spectrum.

Ventana Television Inc. submits this displacement application for W45DF-D to move to channel 30. The attached TV Study report omits WVLT-TV in Knoxville, as WVLT is scheduled to repack to channel 34 during phase 5 by 09/06/2019. Ventana acknowledges the proposed change to channel 30 cannot take place until after WVLT has completed its move to channel 34. See attached waiver request.

TV Study indicates the proposal will receive greater than de minimis interference on channel 30. Ventana agrees to accept that level of incoming interference without objection.
