

ENGINEERING STATEMENT
IN SUPPORT OF AN APPLICATION
POST-INCENTIVE AUCTION SPECIAL DISPLACEMENT WINDOW
WCRD-LP, FREEPORT, ILLINOIS
CHANNEL 33 10 KW MAX DA 446.5 M AMSL

MAY 2018

This engineering statement has been prepared on behalf of FXM Broadcasting, L.L.C., licensee of low power TV station WCRD-LP, Carthage, Illinois and is in support of its application for construction permit for a new digital TV Channel and is being filed during the Post-Incentive Auction Special Displacement Window.

At present station WCRD-LP, Facility ID Number 128366, (BLTTL-20050228ACY) operates on analog TV Channel 44 (650-656 MHz) with 35.5 kW ERP, 396.2 meters antenna height above mean sea level and a directional TV antenna. Since WCRD-LP's analog TV operation is on TV Channel 44 the station must specify a TV channel within channels 2-36 for its digital TV operation. It is proposed to operate on Channel 33 with a maximum of 10 kW ERP using a directional TV antenna. The community of license is being proposed to change from Carthage, Illinois to Freeport, Illinois.

The following information provides pertinent data for the proposed WCRD-LP operation.

Name of the licensee:	FXM Broadcasting, L.L.C.	
Station Location:	IL-Freeport	
Channel:	33 (584-590 MHz)	
Hours of Operation:	Unlimited	
Transmitter:	Type Accepted	
Antenna Type:	SCA, WCRD30CUS	
Antenna Coordinates (NAD83):	North Latitude:	41 deg 59 min 46.00 sec
	West Longitude:	89 deg 12 min 11.00 sec

Maximum effective radiated power (Average):	10 kW 10 dBk
Elevation of the site above mean sea level:	248.4 meters
Overall height of the tower above ground:	208.5 meters
Height of radiation center above ground (meters):	198.1 meters
Height of radiation center above mean sea level (meters):	446.5 meters
Antenna Structure Registration:	1245471

The proposed WCRD-LP facility complies with Section 73.1030 of the Commission's rules; therefore, notification to radio astronomy installations, radio receiving installations and FCC monitoring stations is not required.

INTERFERENCE

An interference study has been conducted according to the TV Study computer software for the proposed WCRD-LP operation on digital TV Channel 33. The TV Study indicates the proposed Channel 33 LPTV operation with 10 kW maximum ERP using a directional TV antenna would not cause interference to any TV, Class A TV or LPTV station. The proposed digital TV operation is predicted to receive 30.7% interference within its noise limited contour. WCRD-LP is willing to accept such interference.

ENVIRONMENTAL PROTECTION ACT

Since WCRD-LP's proposed digital TV operation on Channel would be located on an existing tower (ASR 1245471) the environmental concerns listed in Section 1.1307(a) of the Commission's rules are not pertinent; therefore, those issues have not been addressed.

An evaluation has been made to determine compliance with the Commission's specified standards for human exposure to RF fields as set forth in the OET Bulletin No. 65 dated August 1997. For a maximum effective radiated power of 10 kW and a radiation center of 198.1 meters above ground level, the proposed Channel 33 LPTV operation would have less than 3 microwatt per square centimeter ($\mu\text{W}/\text{cm}^2$) RF field at 2 meters above the base of tower assuming an antenna field factor of 0.5 in the downward direction.

The Commission's guidelines for Channel 33 are $1,947 \mu\text{W}/\text{cm}^2$ for the occupational/controlled, and $389 \mu\text{W}/\text{cm}^2$ for the general population/uncontrolled environment.

The above analysis indicates general public near the tower will not be exposed to RF fields exceeding the Commission's guidelines. With respect to work performed on the tower, WCRD-LP will establish procedures to ensure that workers are not exposed to RF fields above the Commission's guidelines, by reducing or turning off the power, as appropriate.

For the reasons stated above, it is believed this proposal complies with Section 1.1307(a) and (b) of the Commission's Rules; therefore, under Section 1.1306, it is categorically excluded from environmental processing.
