PURPOSE OF AMENDMENT 5.30.2018

This amendment reduces ERP from 79.4 kW to 10.0 kW, specifies a nondirectional antenna, and substitutes Jampro as the manufacturer of the antenna. Because ERP will no longer exceed 10 kW, the exhibit requesting a waiver of Section 73.622(f)(6) of the Commission's Rules is deleted.

This amendment also submits a revised agreement among four low-band VHF television stations regarding acceptance of interference. To the extent that a waiver of Section 73.3517 regarding contingent applications is still required, that waiver is hereby requested.

Finally, the environmental exhibit is replaced.
