

WTHC-LD DISPLACEMENT APPLICATION FOR CH 28 15 kW DA  
ATLANTA, GEORGIA  
ENGINEERING NARRATIVE AND RF RADIATION ENVIRONMENTAL ANALYSIS  
MAY 2018

The proposed facility qualifies for displacement as described in FCC PN DA 18-124 released February 9, 2018. WTHC-LD is a licensed LPTV facility as authorized in file number BLDTL-20060511ABF. The WTHC-LD facility is licensed on CH 42 and thus out of core by definition and displaced due to being located in 600 MHz wireless spectrum.

The proposed site is 23.88 km from the licensed WTHC-LD site and the proposed 51 dBu contour overlaps the licensed site, see Figure 1. The proposed site is 23.1 kilometers from the city of Atlanta, GA reference coordinates in rule section 76.53.

A waiver of the contingent application rule, 73.3517, is respectfully requested. This application is contingent on the grant, construction and licensing of a displacement application filed by WDWL-LD to terminate operation on CH 28 and operate on Channel 2 as filed in 0000051626.

The applicant agrees to a CP condition that it will not begin transmitting on the requested channel prior to discontinuation of WDWL-LD licensed operation on CH 28 in compliance with 73.3700(g)(2).

The proposed CH 28 facility is not believed to be otherwise contingent on an existing authorized facility needing to vacate CH 28 prior to its use by WTHC-LD.

The proposed antenna system is an Alive Telecom UHF panel antenna system model ATC-BPE2C1-28, elliptically polarized antenna with 0.50 degrees electrical beam tilt. The maximum relative field in the elevation pattern across the depression angle range of 25 to 90 degrees is less than 0.20 with a radiation center 82.9 meters above ground. Utilizing formula 10 OF OET Bulletin No. 65, Edition 97-01, a value F of 0.2 has been used to calculate the power density 2 meters above ground. The maximum power density is 5.86 uw/cm squared calculated for an ERP of 15,000 watts H.

and V. polarization. This value is 1.59% of the Public Exposure MPE per section 1.1310. Based on this analysis it is believed that the proposed facility is in compliance with OET-65 Guidelines.

The applicant will reduce power or cease transmission as required to meet FCC OET-65 Guidelines.

The proposed tower is at an existing site with, building, access road and power.

Attached is a copy of the TVStudy interference analysis for CH 28 based on the proposed 15 kW ERP and directional antenna described above with an orientation of 0 degrees. As can be seen at the conclusion there is no ISIX above FCC tolerances. The applicant accepts incoming interference from co-ch facility W42DU-D, CH 28, displacement application, La Grange, Georgia as currently specified in FCC file number BLANK0000053057 so that the applications will not be considered mutually exclusive.

It is believed that the proposed facility provides full protection to all other authorized television facilities.

## REPORT

Study created: 2018.05.31 13:09:34

Study build station data: LMS TV 2018-05-31
