**SUPPLMENTAL ENGINEERING STATEMENT REGARDING
WTVI DRT CHANNEL OF OPERATION**

This exhibit confirms that the only channel available to allow WTVI to continue normal operations to serve its audience is channel 28, which has been chosen for this application.

All channels below channel 37 were evaluated for coverage and interference potential for WTVI and none were identified that provided the ability to continue operation without causing objectionable interference to either Full Service, Class A, or licensed LPTV/translator facilities. We note that the continued use of a UHF channel is highly desirable as viewers already have UHF antennas rather than VHF antennas. So, while the VHF channel range was researched, the choice of a UHF channel will make the transition easier on the existing viewership.

WTVI proposes to continue operation on its current channel 14 assignment until it must cease operations during Phase 5 when WHKY begins operation on channel 14.

Should you have any questions regarding this information please contact me.

Sincerely,

A handwritten signature in black ink that reads "Greg Best, PE". The signature is written in a cursive, flowing style.
