#### JUSTIFICATION FOR EXTENSION OF SILENT STA

These stations operate on Channels 38-51, outside the post-incentive auction television broadcast band, and were notified by T-Mobile that it planned to commence operations on frequencies including the 614-698 MHz band during the 4<sup>th</sup> quarter of 2017.

In order to avoid changing channels twice and to avoid possible interference to T-Mobile's operations, the station was taken dark. For each station, the Licensee filed an application for displacement channel in the window that closed on June 1st. The station will remain dark until a displacement proposal has been approved, although if the one-year deadline in Section 312(g) of the Communications Act to resume operation comes before a displacement application has been granted, special temporary authority may be requested to resume operation on a temporary channel.
