Re: Request for Extension of Time to
Construct Post-Auction Channel Facility
WRFB-DT, Carolina, Puerto Rico
Facility ID No. 54443
LMS File No. 0000055271

Dear Licensee,

On June 18, 2018, Telecinco, Inc. (Telecinco), the licensee of station WRFB-DT, Carolina, Puerto Rico (Station or WRFB-DT), filed the above captioned application seeking a 180-day extension of its construction permit expiration date and waiver of the 90-day construction permit extension filing deadline. For the reasons below, we grant Telecinco's requests.

Background. Pursuant to Section 73.3700(b)(5)(iv) of the Commission's rules (rules), a station may request a single extension of its construction permit deadline of up to 180 days to complete construction of its post-auction facility.¹ Grant of an extension of the construction permit deadline does not alter the deadline by which a station must cease operating on its pre-auction channel. A station anticipating the need for an extension must submit an extension application using FCC Form 2100, Schedule 337, not less than 90 days before the assigned construction permit deadline. The application must demonstrate that the station is unable to complete construction on time due to circumstances that were either unforeseeable or beyond the station's control.² In addition, a waiver of the application filing deadline is appropriate where the particular facts would make strict compliance inconsistent with the public interest and deviation from the general rule would relieve hardship, promote equity, or produce a more effective implementation of overall policy on an individual basis.³

On January 11, 2018, the Media Bureau granted Telecinco's request to modify WRFB-DT's post-auction transition phase to permit the Station to transition to its post-auction channels prior to the start of Phase 1 due to damage to its transmission facilities during Hurricane Maria. The Station was assigned a new testing period start date of July 1, 2018, and is required to cease operation on its pre-auction channel

¹ See 47 CFR § 73.3700(b)(5)(iv). All subsequent requests for additional time to construct are subject to the Commission's tolling provisions, 47 CFR § 73.3598(b).

² The *Incentive Auction R&O* provides examples of six circumstances that might justify an 180-day extension of a station's post-auction construction permit: (1) weather related delays; (2) delays in construction due to the unavailability of equipment or a tower crew; (3) tower lease disputes; (4) unusual technical challenges; or (5) delays caused by the need to obtain government approvals, such as land use or zoning approvals, or to observe competitive bidding requirements prior to purchasing equipment or services; and (6) financial hardship with sufficient supporting evidence. See *Expanding the Economic and Innovation Opportunities of Spectrum Through Incentive Auctions*, Report and Order, 29 FCC Rcd 6567,6804-05, paras. 581-2 (2014) (*Incentive Auction R&O*).

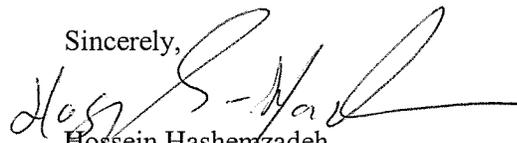

³ See *Northeast Cellular Telephone Co. v. FCC*, 897 F.2d 1164, 1166 (D.C. Cir. 1990) and *WAIT Radio v. FCC*, 418 F.2d 1153, 1159 (D.C. Cir. 1969), *cert. denied*, 409 U.S. 1072 (1972); 47 CFR § 1.3 (waiver for good cause shown).

by August 1, 2018.⁴ In its pending application for an extension, Telecinco states that because of the major damage suffered throughout Puerto Rico as a result of Hurricane Maria, Telecinco is unable to complete construction of its final post-auction facility by August 1, 2018. However, Telecinco states that it will be able to commence operations by that date on the Station's post-auction channel using a temporary facility.⁵ Telecinco also requests waiver of the 90-day extension filing deadline, stating that it was unable to file by May 3, 2018, since it has only recently determined that it would not be able to construct its complete facility by its currently assigned construction permit deadline.

Discussion. Upon review of the facts and circumstances presented, we find Telecinco's request to extend the construction permit deadline to construct WRFB-DT's post-auction facility meets the requirements for a 180-day extension. Telecinco has demonstrated that, despite reasonable efforts, the circumstances in Puerto Rico following Hurricane Maria are such that an extension is needed to complete construction of its post-auction facility. We find grant of the request will have no impact on the overall transition schedule or cause interference to other stations because Telecinco will cease operation on its pre-auction channel by 11:59 pm on August 1, 2018, and commence operation on its post-auction channel using an authorized temporary facility. We also find that grant of the request will not have any negative impact on viewers because the Station will commence operation on its post-auction channel within the timeframe set forth under the transition schedule. To the extent some viewers are unable to receive WRFB's signal while it operates from its temporary facility, we note that WRFB has every incentive to ensure viewers are fully informed about the station's transition plan. Furthermore, based on the unique situation confronted by Telecinco, waiver of the 90-day extension filing deadline is in the public interest and consistent with the Commission's general waiver standard since the station did not learn of the potential tower issue until after the 90-day filing deadline.

The above facts considered, Telecinco's request for waiver of the construction permit extension deadline and application for extension of construction permit expiration date **ARE GRANTED**. The construction permit for WQTO, Ponce, Puerto Rico, **IS EXTENDED** for 180 days **to January 28, 2019**. Grant of this extension does not alter the deadline by which the Station must discontinue operations on its pre-auction channel – 11:59pm local time on August 1, 2018. We also remind Telecinco that any subsequent requests for extension of its construction permit deadline will be subject to the Commission's tolling provisions.⁶

Sincerely,

Hossein Hashemzadeh
Deputy Chief, Video Division
Media Bureau
