

Reason for Amendment

The instant application is being filed to amend the pending minor change application (LMS File No. 0000035732) filed to increase WPTA's noise-limited contour beyond the station's currently-authorized facilities. This application specifies a new tower ASR number and coordinates and resultant increase in antenna height. The applicant is also proposing a compensating decrease in effective radiated power (ERP) to avoid any extension of the protected contour associated with the original window filing.
