

***AMENDMENT TO
APPLICATION FOR CONSTRUCTION PERMIT***

**WDNP-LD - ST. PETERSBURG, FLORIDA
LMS FILE NO. 0000054701 / FACILITY ID: 67986**

DIGITAL NETWORKS—SOUTHEAST, LLC

JULY 2018

AMENDMENT TO APPLICATION FOR CONSTRUCTION PERMIT

The following engineering statement and attached exhibits have been prepared for **Digital Networks-Southeast, LLC** ("Southeast"), licensee of digital low-power television station WDNP-LP at St. Petersburg, Florida, and are in support of their amendment to application for construction permit.¹ This submission is being filed as an amendment to the original application filed within the Commission's recent LPTV displacement window.² The submission of this amendment has become necessary due to the applicant being recently advised that the tower owner after all is unable to accommodate them on the originally specified tower.

As was discussed in the engineering statement for the original application, WDNP-LP qualified to file its original application due to displacement by the post-repack table of allotments. Specifically, WDNP-LP would be required to change channel due to WSPF-CD at St. Petersburg being assigned channel 36 in the post-repack environment.³

WDNP-LD is currently licensed to operate on channel 36 as a digital low-power television station.⁴ The authorized effective radiated power is 15.0 kW at a center of radiation of 78.9 meters above mean sea level utilizing an antenna specified as non-directional. The proposed facility, as amended, would operate on channel 34 with a maximum effective radiated power of 11.5 kW at a center of radiation of 103 meters above mean sea level utilizing a directional antenna. The antenna proposed for use is a Propagation Systems ("PSI") model PSILP12AMR. It is proposed that the main lobe of this antenna be oriented at 315 degrees true.

¹ The Facility ID for WDNP-LD at St. Petersburg, Florida is 67986.

² See LMS File No. 0000054701.

³ The Facility ID for WSPF-CD at St. Petersburg, Florida is 11559.

⁴ See LMS File No. 0000007389.

It is proposed under this application that the facility be relocated from its current location. Exhibit E-1 provides a graphical illustration of the current site, proposed site, and 48 kilometer radius centered on the reference coordinates of the community of license.⁵ As this map demonstrates, the proposed transmitter location would be located within 48 kilometers of the reference coordinates of St. Petersburg. Relocation within this distance complies with the provisions of Section 74.787(a)(4) of the Commission's Rules.

Exhibit E-2 provides the output from *TVStudy* for the proposed facility. This study demonstrates that the proposed facility has an interference check failure to BLEDT-20060913ABQ. This license is the channel 34 license for WEDQ at Tampa, Florida.⁶ WEDQ has entered into a channel sharing agreement with WEDU at Tampa, Florida.⁷ WEDQ will be operating on channel 13 as a result of this agreement, thus the interference indicated in the study will become moot. Southeast therefore respectfully requests a waiver of section 74.793 of the Commission's Rules, if necessary, in this instance. If necessary, Southeast agrees to any special condition imposed on its construction permit relative to the cessation of operation by WEDQ on channel 34 at Tampa.

In addition, the *TVStudy* output also indicates a mutual exclusivity situation with BLANK0000054933, which is the pending application for WSVT-LD at Tampa, Florida.⁸ As indicated by the study, the proposed facility as amended is predicted to cause 1.91% interference to that facility. No interference to WDNP-LD from WSVT-LD is proposed. As a result, it is believed

⁵ The reference coordinates of St. Petersburg were determined through the Commission's online utility to be 27-46-56.1 north latitude and 82-40-03.4 west longitude.

⁶ The Facility ID for WEDQ at Tampa, Florida is 69338.

⁷ The Facility ID for WEDU at Tampa, Florida is 21808.

⁸ The Facility ID for WSVT-LD at Tampa, Florida is 54948.

jeremyruck.com

that no actual MX situation exists.

The proposed facility would not constitute a significant environmental impact, and is exempt from environmental processing. The proposed antenna would be mounted to an existing tower that is registered with the Commission. The addition of the proposed antenna to this tower would not increase the existing environmental impact already present from the structure. Additionally, the proposed facility would not constitute an RF safety exposure to persons in the vicinity of the site.

Using the equations in Supplement A of *OET Bulletin 65*, the calculated worst-case power density at ground level assuming a downward radiation relative field of 0.3 is $3.60 \mu\text{W}/\text{cm}^2$. This value is less than the upper limit of the uncontrolled environment condition. Southeast certifies it will coordinate with all other users of the site to ensure that workers and other personnel are not exposed to levels of radiofrequency radiation in excess of the applicable safety standards. Coordination activities will include, but are not necessarily limited to, a reduction in transmitter power or cessation of operation.

The proposed facility complies with the provisions of Section 74.709 of the Commission's Rules. No land mobile protection issues have been identified based on the tables in that section of the rules, or on the output of *TVStudy*. The proposed facility also complies with Sections 74.793(e)-(h) and 74.793(h) of the Commission's Rules, with the exception of the above discussed issue relative to the defunct license for WEDQ on channel 34.
