**Engineering Statement**

**WKIZ-LD FI 4323**

Applicant is seeking a waiver of Rule 312G to remain silent for an additional 6 months. This site was destroyed by Hurricane Irma; there was extensive flooding that caused major infrastructure damage and the antenna was completely destroyed. The applicant has filed for a displacement to Ch 29 in the most recent filing window. The Applicant has not been granted a construction permit on Ch 29 and cannot begin the process of doing site repair work and ordering equipment. Given the lead times for antenna and transmitter deliveries and tower crew scheduling the Applicant will need additional time to construct the facility to the new in-core digital channel.

Respectfully submitted,

Susan Hansen
