

### **KSBI ENGINEERING STA REQUEST**

KSBI(TV), Oklahoma City, Oklahoma (FIN 38214) experienced an equipment failure on August 24, 2018 that is preventing the station from operating at full power. A 10-day notice was provided to Commission staff on September 2, 2018. Because it is unlikely that the station will resume licensed operations prior to the 30<sup>th</sup> day of reduced power operations, licensee hereby requests a 180-day STA to operate at reduced power.

Specifically, the station is operating at reduced power due to a High Voltage power supply failure. The parts required to get the High Voltage supply operational are not available from the manufacture currently and are being constructed. Licensee reasonably anticipates that the station will resume licensed operations within the 180-day STA period.
