

Extraordinary Circumstances

WETU, Montgomery, AL is currently operating on Channel 39 and has been granted a displacement application to move to channel 21.

However, WETU is waiting on the equipment to move to channel 21 and T-Mobile wishes to begin operation in the area. Therefore, we seek temporary relief by taking the station silent for now till we can complete construction on Channel 21. Since T-mobile will bring new cell service to the area, the public interest will be furthered by the grant. The expected duration of the STA should be less than 6 months.
