

KVVV-LD FACILITY MINOR CHANGE APPLICATION FOR CH 15 15 kW DA  
HOUSTON, TEXAS  
ENGINEERING NARRATIVE AND RF RADIATION ENVIRONMENTAL ANALYSIS  
JULY 2018

The proposed facility qualifies for displacement as described in FCC PN DA 18-124 released February 9, 2018. KVVV-LD is a licensed LPTV facility as authorized in file number BLDTL-20120125ABS. The KVVV-LD licensed facility has been analyzed using TVStudy and been determined to cause impermissible interference to full service co-channel station KFDM, CH 15, Beaumont, Texas. The TVStudy output is below:

Study cell size: 0.50 km  
Profile point spacing: 0.50 km

Maximum new IX to full-service and Class A: 0.50%  
Maximum new IX to LPTV: 2.00%

\*\*IX check failure to BLANK0000033630 CP scenario 1, 6.87% interference caused  
\*\*IX check failure to BLANK0000033630 CP scenario 2, 6.87% interference caused  
\*\*IX check failure to BLANK0000033630 CP scenario 3, 6.88% interference caused  
\*\*IX check failure to BLANK0000033630 CP scenario 4, 6.87% interference caused  
\*\*IX check failure to BLANK0000033630 CP scenario 5, 6.88% interference caused  
\*\*IX check failure to BLANK0000033630 CP scenario 6, 6.87% interference caused

FCC application 0000033630 CP is KFDM CH 15 Beaumont, Texas.

Since there are no vacant channels on which to file for displacement this minor change application is being filed. No change in frequency, transmitter site or antenna RC AMSL is proposed herein. A modified directional antenna pattern is proposed that reduces interference to KFDM to less than a 0.5% increase in interference. Figure 1 attached compares the licensed and proposed 51 dBu F(50,90) contours.

The proposed CH 15 facility is not believed to be contingent on an existing authorized facility needing to vacate CH 15 prior to its use by KVVV-LD.

The proposed antenna system is an RFS UHF panel antenna system model PEPSIL18C3C4, elliptically polarized antenna with 1.0 degree electrical beam tilt. The maximum relative field in the elevation pattern across the depression angle range of 25 to 90 degrees is less than 0.20 with a radiation center 492.6 meters above ground. Utilizing formula 10 of OET Bulletin No. 65, Edition 97-01, a value F of 0.2 has been used to calculate the power density 2 meters above ground. The maximum power density is 0.17 uw/cm squared calculated for an ERP of 15,000 watts H. and V. polarization. This value is 0.0525% of the Public Exposure MPE per section 1.1310. Based on this analysis it is believed that the proposed facility is in compliance with OET-65 Guidelines.

The applicant will reduce power or cease transmission as required to meet FCC OET-65 Guidelines.

The proposed tower is at an existing site with, building, access road and power.

Attached is a copy of the TVStudy interference analysis for CH 15 based on the proposed 15 kW ERP and directional antenna described above with an orientation of 245 degrees. As can be seen at the conclusion there is no ISIX above FCC tolerances and received interference is less than 2% of the population inside the noise limited contour.

It is believed that the proposed facility provides full protection to all other authorized television facilities.

## REPORT

Study created: 2018.07.04 15:07:28

Study build station data: LMS TV 2018-07-04
